

CHISELS

With SDS-plus shank

Characteristics

- Advanced forging technology with custom-made inductive heating guaranteeing precision-formed tools.
- Hardening and tempering processed in a fully automated salt-bath hardening machine GUARANTEEING uniform heat treatment.
- Shot-blasting process at end of manufacture giving additional finish and protection by creating a harder and denser surface and improving stress resistance.

REISSER®

Standards

- German manufactured to DIN ISO-9001

Packaging

- On individual hangers or loose in bulk

Application

- For easy chiselling tasks in concrete, masonry, brick or natural stone when using an SDS-Plus machine in the 2-4Kg class.
